

AECC is proud to offer advanced imaging services to local Veterinarians. The prices below are for imaging services only. This means that there will be no exam or exam fee associated with the imaging. Imaging is offered as a service to aid your doctors in treatment and diagnosis.

<i>Service</i>	<i>Description</i>
<i>MRI / CSF Tap</i>	Includes consult, imaging, radiologist interpretation, anesthesia, CSF Tap, CSF culture, cytology, protein analysis, hospital stay, and oral medications. Does not include myelogram or preanesthetic lab work.
<i>CT with Contrast</i>	One complete study done under general anesthesia. This includes, anesthesia, monitoring, pre contrast scan, post contrast scan, and submission to a boarded radiologist.
<i>CT w/o Contrast</i>	One complete study done under general anesthesia. This includes anesthesia, monitoring, CT scan, and submission to a boarded radiologist.
<i>CT w/Sedation</i>	A localized study (nasal cavity, brain, or small areas), This includes sedation, CT scan, and submission to a boarded radiologist.
<i>*Additional Study</i>	Additional CT scan done on a patient that is receiving one of the above during the same anesthetic event. This includes CT scan and submission to a boarded radiologist.
<i>2 view Radiograph</i>	2 radiographs (x-rays) of any area or limb and a digital copy of the images provided on a CD. This does not include radiologist review of the film.
<i>3 view Radiograph</i>	3 radiographs (x-rays) of any area or limb and a digital copy of the images provided on a CD. This does not include radiologist review of the film.

All radiographs are stored digitally and hospitals will have access to the images through DVMinSight on the internet.
